

PRESS RELEASE

Linutop Announces a LAMP server!

New, small and secure Operating System, Linutop OS 4.0 allows a Lamp Server installation in one click to host a web site.

Paris, France – February 29th, 2012 – Today Linutop releases version 4.0 of its system (OS), which is optimized for its miniature, energy-efficient fanless PCs. Now this version is compatible with i386 PCs and can, in one click, host a web site with a LAMP server.

Linutop LAMP server:

LAMP stands for Linux, Apache, MySQL and PHP. This open source software combination is designed to host a web site.

Linutop LAMP server Key Benefits are:

- Quick installation (one click)
- Energy efficient Server (8W on Linutop2) ideal for 24/24, 7/7 uses, designed for minimal processing power.
- Small, Silent (fanless) and robust.

Linutop Lamp Server can be used as a mini web server, in order to keep personal data in-house.

“Linutop mini PCs are ideal for mini web LAMP servers; it allows customers to securely share information with minimal maintenance costs. With Linutop OS a LAMP server can even run on a PC from a USB key!” said **Frédéric Baille, CEO of Linutop.**

Linutop OS 4.0

The new Linutop OS 4.0 is based on the latest long term support Ubuntu version ‘Lucid Lynx’, delivered with ready-to-use Linux software, including Firefox, OpenOffice, and VLC Media player.

Linutop OS 4.0 new **Configuration Panel** allows a quick configuration for a professional specific use, in secured public Internet access, digital signage, network monitoring, thin client use, mini server and enables **LAMP server’s** installation in one click.

Linutop OS 4.0 Main features:

- **Light** - Only 700Mo with all configured software and languages, powerful processor not required.
- **Touch Screens** - Integrated calibration tool most touch screen work out of the box on the Linutop OS.
- **Internet Kiosk** - Allows professionals (internet cafes, hotels...) to configure their homepages in full screen with toolbar or not, to block certain websites or to lock on designated websites.
- **Digital Signage** - Allows professionals to configure (with drag’n drop) playlist including time and order for images (JPEG,PNG...), URLs, folders and video files.

Linutop

- **Linutop Lock Security** - The system can be locked in read only mode, preventing alterations by viruses or other mishaps. Its ability to recover its initial state at startup minimizes maintenance costs.
